

HP Procurve Networking

CAE and HP Procurve.

With a reputation as one of the leading integrators in the United Kingdom CAE recognises the HP Procurve can play an integral role in delivering a cost effective, scalable and secure network platform.

CAE has a unique ability to take a wide and deep view of your infrastructure with recommendations that are purely based on assessment of business need. With services that ensure performance and interoperability from design through to support HP Procurve can be seamlessly incorporated into any network.

The CAE partnership with HP is long standing and based on mutual recognition of the skills and technology that each brings in order to deliver the best possible customer experience

Why HP Procurve?

More choice and flexibility

HP ProCurve's tradition of driving and building on industry standards means more technology choice, flexibility, and investment protection. With HP ProCurve solutions, networks are built to meet business needs.

More secure

HP ProCurve Networking security solutions proactively detect and help protect against threats with pervasive, advanced security technologies built on trusted open standards.

More efficient

HP ProCurve Networking wired and wireless solutions increase operational efficiencies with reduced complexity and easier management for better use of network assets.

More value

HP ProCurve Networking solutions provide more value from network investments by delivering advanced technology, ease of use, superior ROI, and lower cost of ownership.

More reliable

HP ProCurve Networking creates highly reliable networks through rigorous quality testing and exceptional engineering.

	Scenario	Solution
Essential network connectivity	Your organisation is growing—more employees, more computers, more printers. Without a network, employees are unable to access each other via e-mail, share files, share printers, or access the Internet, limiting productivity.	<p>The benefits of creating a network for your business are far reaching. An HP ProCurve network allows your company to:</p> <ul style="list-style-type: none"> Exchange ideas and documents over e-mail Access the Internet for quick and easy research Share a high-performance print device and eliminate individual desktop printers for each employee Easily add a HP ProCurve wireless accesspoint, if mobile workers or guests require wireless connectivity
Improved network performance for growing businesses/organisation	Your employees need to share data and large files with each other and between numerous printers, scanners, data storage devices, and servers. It seems that network traffic is always heavy. Employees—and clients—are getting frustrated with the slow network	<p>Improve the performance of your network to help employees connect with each other and to network resources quickly and easily with HP ProCurve Gigabit switches. HP ProCurve Gigabit network performance is all about greater efficiency, greater productivity, investment protection, and the ability to improve customer service.</p> <ul style="list-style-type: none"> Exchange large files without hesitation—and without a wait on the part of recipients. Handle bandwidth-hungry applications such as graphical data, video streams, large databases, and data storage with ease. Realise greater performance from any Gigabit enabled devices that are connected to the network, including PCs, laptops, printers, and servers.
Increased security	You worry about protecting your customers' most valued asset—their private data. You have heard about hackers stealing credit card numbers and other valuable data, but you are unsure of how to prevent such an attack on your own network.	<p>HP ProCurve protects your information and assets with trusted industry-standards-based security solutions for wired and wireless networking. HP ProCurve weaves security capabilities throughout its network infrastructure—security is built in, not bolted on; and ProCurve puts more intelligence and security at the edge of the network—the first line of defense where users connect.</p>

.....Your Business.

<p>Flexible wireless connectivity</p>	<p>Your company has branch offices with a number of employees. You have vendors and clients who often need Internet access while in your offices for meetings. You want to give employees, vendors, and clients the flexibility to connect wirelessly from anywhere within the office while still protecting your network and company data.</p>	<p>Simple wireless connectivity HP ProCurve's mobility solutions encompass an integrated set of products, providing design, deployment, and management that is secure and fast, and provides appropriate levels of access for wireless network users.</p> <p>Increase employee productivity and flexibility by supporting wireless laptops, PDAs, and mobile devices</p> <p>Enable employees to connect to the company network easily and access the information they need—regardless of which building or conference room they are in Allow visitors to log on as well, with the network providing the appropriate level of access, while still safeguarding areas of the network that are intended exclusively for employees.</p>
<p>Converged communications</p>	<p>The network requirements are increasing for your growing business—you want to integrate more things onto one converged network. You have customer facing needs such as integrated point of sale and wireless scanners. In the back office you need desktop computers, wireless laptop computers, printers, and digital inventory control. And there's building access control, security cameras, and Voice over IP telephony.</p> <p>Can your current network handle the load?</p>	<p>HP ProCurve offers a simplified network infrastructure design that accommodates cost-effective voice, video, and data applications. It delivers robust reliability through open-standards technology and enables secure deployment of both existing and emerging applications.</p> <p>By using your data network to transmit voice and video, you may achieve significant long-term cost savings. Industry estimates show that implementing a VoIP solution can actually reduce intra-office communications costs by as much as 60 percent. In addition to cost savings, IP networks can be easier to maintain than voice networks.</p>

Product Overview.

Procurve Switches

A complete line of products providing a superior reliability, proven performance and comprehensive features that help reduce complexity and maximize return on IT.

HP Procurve switches enable unified core-to-edge solutions through award-winning ProVision technology, streamlining network operations, management and support. Embrace business opportunity with a HP Procurve adaptive network.

Wireless LAN (WLAN)

HP Procurve offers intelligent 802.11n wireless networking solutions that provide access, management and security for businesses of all sizes with the flexibility to easily tailor your network to meet changing needs.

MultiService Mobility Solution

An overlay wireless solution that can be added to any wired network to provide scalable, secure connectivity for 802.11 a/b/g/n client services.

Wireless Edge Services Solution

An integrated wireless solution for ProCurve's zl and xl switches that provides secure network services to 802.11 a/b/g client devices.

Independent Access Point and Hotspot Solutions

Secure and reliable 802.11 and .11a/b/g wireless solutions for a small deployment and service provider.

WLAN Accessories

Accessories that extend connectivity to wired devices and increase the versatility of the wireless network.

WAN

ProCurve WAN products provide a robust array of wide area connectivity options, easy to use VPN capabilities and comprehensive security features in a flexible, modular form factor for small and medium sized enterprises.

Data Centre Management

Data centre management solutions from HP Procurve provide policy-based, automated provisioning of network and server resources with virtualisation compatible management of device connections in medium to large data centre environments.

Network Management Software

Network management solutions provide basic-to-advanced device-handling capabilities such as mapping, configuration and monitoring across LAN and Wireless LAN networks in order to improve productivity and simplify management.

Network Security

ProCurve's ProActive Defense solution is a built upon integrated, standards-based security capabilities in ProCurve devices and provides layered security to protect network resources, detect and respond to network threats.

Services.

CAE offer a full range of services to help identify and fulfill your networking needs, managing TCO's and support your Business.

Design

CAEs team of HP Procurve consultants can work with you to put together comprehensive network designs encompassing the HP Procurve portfolio. Due to the multi-skilled nature of our consultants, we are able to work in multi vendor environments, providing a complete end to end network design ready to be implemented.

Audit

CAE helps to identify what resources you have, while making practical recommendations for enhancing your network in order to meet your business needs.

Install

HP Procurve consultants and engineers within CAE have trained to a high level of accreditation within HP ensuring that any deployments are completed to the highest standard and following HP and industry best practice.

Support

All HP Procurve is covered by a lifetime warranty; CAE enhance this with options for different levels of onsite support.

The ProCurve Open Network Ecosystem

ProCurve's Open Network Ecosystem (ONE) is a new initiative from HP ProCurve that provides you with a choice of best-in-class applications and services that integrate into your network.

It consists of:

An ecosystem of market leading Alliance partners that provide a choice of applications, which have been integrated or tested with ProCurve's open-standards network.

Whatever your business objectives and challenges, CAE & HP Procurve have a portfolio of solutions specifically designed for your company or organisation.

Contact CAE for all your networking requirements.
