

NetApp

Storage Efficiency

NetApp Storage Efficiency.

NetApp storage efficiency in an existing SAN environment which can double the utilisation of current storage infrastructures and lower capacity and operating expenses by up to 50% without changing the environment.

Silver Partner

What does NetApp deliver?

- Cut storage capacity requirements and operating expenses by 50%
- Optimise the storage you already have and reduce unused space by 33% or more
- Double storage utilisation without compromising performance and availability
- Gain immediate visibility into all storage resources in a multivendor environment
- Manage 2 to 3 times as much data without increasing staff

How does NetApp deliver this?

- Cut storage capacity requirements by deduplicating data across your primary, secondary, and archival storage environments.
- Boost storage efficiency even on existing competitive storage with V-Series systems.
- Improve your storage utilisation with thin provisioning, which enables you to resize your storage dynamically without disruption and virtually eliminate unused capacity.

- Maximise efficiencies by using SANscreen® to automatically discover unused and underutilised resources. You can use this data to implement a tiered storage solution that Optimises the utilisation of your high-performance storage systems.
- Help reduce administrative costs by automating labour-intensive tasks and easily managing

Our knowledge. Your business.

It works.

advanced storage efficiency features through manageability software.

- Further simplify manageability and reduce overhead by leveraging a unified storage architecture that supports all storage protocols and data types.
- Realise cost-effective disaster recovery by replicating only changed data blocks, saving time and network bandwidth.

What does this mean for you?

- Reduce TCO, including capacity and operating expenses, by more than 50%
- Improve productivity and respond faster to business needs
- Cut storage requirements for backup and replication and recover in minutes
- Maximise the value of your existing storage

Our aim is to provide a service that is completely intuitive to your needs; we provide a framework which can be tailored to your exact requirements
